

# Table of Contents

<u>Section</u>	<u>Page</u>
<b>Section 1</b>	<b>INTRODUCTION..... 1-1</b>
1.1	Location of Project Area ..... 1-2
1.2	Project Objectives and Description ..... 1-2
1.3	Existing Groundwater Basin Management..... 1-14
1.4	Purpose and Scope ..... 1-14
<b>Section 2</b>	<b>CRITICAL RESOURCES AND POTENTIAL ADVERSE IMPACTS IN OR ADJACENT TO THE PROJECT AREA .....2-1</b>
2.1	Potential Impacts to Springs within the Affected Watersheds including Springs within the Mojave National Preserve and BLM-Managed Lands..... 2-1
2.2	Potential Impacts of the Project to the Aquifer System ..... 2-1
2.3	Potential Impacts to Brine Resources on Bristol and Cadiz Dry Lakes ..... 2-2
2.4	Potential Impacts to Air Quality..... 2-2
<b>Section 3</b>	<b>WATER RESOURCES MODELS .....3-1</b>
3.1	Description of Water Resources Models..... 3-1
3.1.1	Rainfall-Runoff Model..... 3-1
3.1.2	Unsaturated Zone Flow and Transport Model ..... 3-2
3.1.3	Saturated Zone Flow and Transport Model..... 3-2
3.1.4	Density Dependent Groundwater Flow and Transport Model ..... 3-2
3.2	Evaluation of Potential Adverse Impacts Using Numerical Models..... 3-3
3.2.1	Evaluation of Variable Recharge Estimates and Long-Term Impacts ..... 3-3
3.2.2	Model Refinement and Multi-Year Predictions ..... 3-3
<b>Section 4</b>	<b>AIR QUALITY ANALYSES RELATED TO MOBILIZATION OF LAKEBED DUST .....4-1</b>
4.1	Air Quality Monitoring at Bristol and Cadiz Dry Lakes ..... 4-1
4.2	Regional Meteorological Monitoring..... 4-2
<b>Section 5</b>	<b>MONITORING NETWORK .....5-1</b>
5.1	Proposed “S-Series” Observation Wells (Feature 1)..... 5-1
5.2	Springs (Features 2 and 3)..... 5-8
5.3	Observation Wells (Features 4 through 6) ..... 5-8
5.4	Proposed Observation Well Clusters Within the Immediate Project Area (Features 5 and 6) ..... 5-14
5.5	Project Production Wells (Feature 7) ..... 5-14
5.5.1	Existing Cadiz Agricultural Wells ..... 5-14
5.5.2	New Production Wells ..... 5-14
5.6	Recharge Water Quality (Feature 8) ..... 5-14
5.7	Spreading Basins - Water Level Staff Gages (Feature 9)..... 5-14

**Table of Contents (Continued)**

<u>Section</u>	<u>Page</u>
5.8	Land Surface Monitoring (Feature 10) ..... 5-16
5.9	Extensometers (Feature 11) ..... 5-16
5.10	Microgravity Reference Stations (Feature 12)..... 5-16
5.11	Flowmeter Surveys (Feature 13)..... 5-17
5.12	Proposed Observation Well Clusters at Bristol Dry Lake (Feature 14)..... 5-17
5.13	Proposed Observation Well Clusters at Cadiz Dry Lake (Feature 15) ..... 5-17
5.14	Evapotranspiration Stations (Feature 16)..... 5-17
5.15	Surface Water Monitoring Stations on the Dry Lakes (Feature 17) ..... 5-17
5.16	Air Quality Monitoring (Feature 18) ..... 5-17
	5.16.1 Monitoring at Bristol and Cadiz Dry Lakes..... 5-17
	5.16.2 Regional Meteorological Monitoring ..... 5-18
5.17	Resistivity Survey (Feature 19) ..... 5-18
5.18	Gamma-Ray/Dual Induction Downhole Geophysical Logs (Feature 20)..... 5-18
5.19	Weather Stations (Feature 21) ..... 5-18
5.20	Stream Gage (Feature 22) ..... 5-19
5.21	Soil Moisture Sensors (Feature 23)..... 5-19
5.22	Meteorological Towers (Feature 24) ..... 5-19
<b>Section 6</b>	<b>MONITORING, TESTING AND REPORTING PROCEDURES..... 6-1</b>
6.1	Monitoring of Springs on Mojave National Preserve and BLM-Managed Lands in the Affected Watersheds ..... 6-1
	6.1.1 Pre-Operational Monitoring of Springs ..... 6-1
	6.1.2 Operational Monitoring of Springs..... 6-2
	6.1.3 Post-Operational Monitoring of Springs..... 6-2
6.2	Aquifer System ..... 6-3
	6.2.1 Pre-Operational Monitoring Aquifer System..... 6-3
	6.2.2 Operational Monitoring of Aquifer System..... 6-4
	6.2.3 Post-Operational Monitoring of Aquifer System..... 6-5
6.3	Bristol And Cadiz Dry Lakes..... 6-5
	6.3.1 Pre-Operational Monitoring of Bristol and Cadiz Dry Lakes..... 6-5
	6.3.2 Operational Monitoring of Bristol and Cadiz Dry Lakes ..... 6-6
	6.3.3 Post-Operational Monitoring of Bristol and Cadiz Dry Lakes ..... 6-6
6.4	Air Quality ..... 6-7
	6.4.1 Pre-Operational Air Quality and Related Monitoring..... 6-7
	6.4.2 Operational Air Quality Monitoring ..... 6-9
	6.4.3 Post-Operational Air Quality Monitoring Stations ..... 6-10
6.5	Other Monitoring (Regional) ..... 6-10
	6.5.1 Pre-Operational Regional Monitoring ..... 6-10
	6.5.2 Operational Regional Monitoring ..... 6-11
6.6	Quality Assurance/Quality Control..... 6-12
6.7	Data Management ..... 6-12
6.8	Reporting Procedures..... 6-12
	6.8.1 Annual Reports ..... 6-12
	6.8.2 Five-Year Report ..... 6-13

**Table of Contents (Continued)**

<u>Section</u>		<u>Page</u>
<b>Section 7</b>	<b>ACTION CRITERIA, DECISION-MAKING PROCESS AND CORRECTIVE MEASURES.....</b>	<b>7-1</b>
7.1	Springs.....	7-5
7.1.1	Potential for Impacts to Springs in the Mojave National Preserve and BLM Managed Lands in the Affected Watersheds .....	7-5
7.2	Aquifer System.....	7-7
7.2.1	Potential Impacts to Indigenous Groundwater Quality due to Project Operations .....	7-7
7.2.2	Potential Impacts to Wells Owned By Neighboring Landowners due to Project Operations .....	7-8
7.2.3	Potential for Land Subsidence.....	7-9
7.2.4	Potential for Increased Risk of Liquefaction Related to Project Spreading Operations.....	7-11
7.2.5	Potential for Hydrocompaction Related to Project Spreading Operations .....	7-12
7.2.6	Potential for Induced Flow of Lower-Quality Water From Bristol and Cadiz Dry Lakes .....	7-13
7.3	Bristol And Cadiz Dry Lakes .....	7-14
7.3.1	Potential for Impacts to the Brine Resources Underlying Bristol and Cadiz Dry Lakes .....	7-14
7.4	Air Quality.....	7-16
7.4.1	Potential Impacts to Air Quality due to Dust Mobilization from Water-Level Declines Beneath Bristol and Cadiz Dry Lakes .....	7-16
<b>Section 8</b>	<b>CLOSURE PLAN AND POST-OPERATIONAL REPORTING.....</b>	<b>8-1</b>
8.1	Closure Plan .....	8-1
8.2	Post-Operational Reporting.....	8-1
<b>Section 9</b>	<b>TECHNICAL REVIEW PANEL.....</b>	<b>9-1</b>
9.1	Representation.....	9-1
9.2	Responsibilities .....	9-1
9.3	Annual And Five-Year Monitoring Reports .....	9-2
9.4	Recommendations to the BLM Authorized Officer .....	9-2
<b>Section 10</b>	<b>BLM AUTHORIZED OFFICER.....</b>	<b>10-1</b>
10.1	Responsibilities .....	10-1
10.2	Decision-Making Process .....	10-1

## Table of Contents (Continued)

### Appendices

- A. ASTM D5092-90, Standard Practice for Design and Installation of Groundwater Observation Wells in Aquifers
- B. Groundwater Level Monitoring Protocol
- C. Groundwater Sampling Protocol
- D. Water Quality Analytical Protocol
- E. Data Management Plan

### List of Tables

<b><u>Tables</u></b>	<b><u>Pages</u></b>
1 Proposed Monitoring Features and Frequencies .....	1-3
2 Summary of Monitoring Features and Protocols .....	5-2
3 Spring Classification Criteria.....	6-1
4 Summary of Action Criteria, Impacts and Corrective Measures .....	7-2

### List of Figures

<b><u>Figures</u></b>	<b><u>Page</u></b>
1 Location of the Bristol, Cadiz, Fenner, and Orange Blossom Wash Watersheds.....	1-11
2 Proposed Project Wellfield and Spreading Basins.....	1-12
3 Proposed Project Facilities.....	1-13
4 Monitoring Features (Regional).....	5-9
5 Monitoring Features (Detail of Project Area).....	5-11
6 Typical Observation Well Cluster Cross Section .....	5-13
7 Typical Production Well Cross Section .....	5-15
8 Location of Precipitation Stations in the Desert Southwest Region .....	5-20
9 Management Schedule for Proposed Monitoring Activities.....	5-22
10 Decision-Making Process .....	7-4
