NOTICE OF AVAILABILITY
Draft Environmental Impact Report/Environmental Impact Statement For the Cadiz Groundwater Storage and Dry-Year Supply Program
The is to inform all interested persons that pursuant to the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA), the Metropolitan Water District of Southern California (Metropolitan) and the U.S. Department of Interior Bureau of Land Management (BLM) have jointly prepared a Draft Environmental Impact Report/Environmental Impact Statement (Draft EIR/EIS) for the proposed Cadiz Groundwater Storage and Dry-Year Supply Program. Metropolitan is the Lead Agency under CEQA, and the BLM is the Lead Agency under NEPA.
The Draft EIR/EIS evaluates a range of alternatives for conveying water between the Colorado River Aqueduct and the aquifer underlying the Cadiz and Fenner Valleys. The aim of the Cadiz Project is to ensure the reliability of Metropolitan's existing water supply in the Colorado River Aqueduct. The project achieves this goal by storing Colorado River water in the Cadiz/Fenner aquifer and withdrawing the stored water along with indigenous groundwater during dry years. Proposed facilities reviewed in the Draft EIR/EIS are a pipeline or canal for conveying water between the Colorado River Aqueduct and the Cadiz/Fenner area, a pumping plant, spreading basins for percolation of Colorado River water into the aquifer in the Cadiz/Fenner area, a wellfield for extracting Project water from the Cadiz/Fenner aquifer, and associated power poles and lines along the conveyance pipeline and in the wellfield.
The project area is located in the eastern Mojave Desert region of San Bernardino County in the Cadiz and Fenner valleys and crosses federal land administered by the BLM. The BLM has determined that an EIS would be required as the proposed action includes an amendment of the California Desert Conservation Area (CDCA) Plan and right-of-way easements across federal lands.
The Draft EIR/EIS addresses existing environmental conditions, potential impacts, and proposed mitigation measures associated with the proposed project. The Draft EIR/EIS indicates the possibility of some significant adverse effects, even after the implementation of the mitigation measures identified in the Draft EIR/EIS, for the parameters of paleontological resources, air quality, and hazardous materials.
Copies of the Draft EIR/EIS and supporting technical reports will be available for public review from November 26, 1999, through February 22, 2000, at the following locations:
Needles Branch Library, 1111
