January 7, 2001

Mr. James Williams
Bureau of Land Management

P73

Dear Mr. Williams,

I am concerned about the impact that the proposed ground water storage and pumping plan of Cadiz and MWD would have on the natural values of the Mojave Natural Preserve and adjacent wilderness areas.

P73-1

I am concerned that your supplemental environmental impact statement does not adequately address issues such as the quality of the water to be imported or what steps should be taken by your agency to insure that surface values are protected.

P73-2

Thank you

Jim Blomquist
