Dear Mr. James Williams;

Re: Cadiz Project

The Cadiz project is a groundwater grab. It affects wildlife and air quality ^{negatively} ~~in~~ the Mojave Nat'l Preserve, Joshua Tree Nat'l. Park and several BLM wilderness areas. As a resident of the San Joaquin Valley I am intimately concerned about conservation of water. We need to urge you to make a decision that promotes the public interest of Southern California, not to permit huge private profit. The SEIS does not fully examine the potential problems that could result from draining the desert for its precious and scarce water supply.

Sincerely,
Lorraine Unger
