To Whom It May Concern:

I am opposed to the Cadiz Project,  
groundwater grab, in the Mojave Desert. It involves  
unhealthy water & impacts sensitive lands & species.  
The SEIS is incomplete in examining potential  
problems, water quality monitoring, spelling out  
criteria for protection of endangered species &  
public lands. It needs to examine alternatives  
Impact affects 2 national parks & five  
wilderness areas. This project robs us of  
protection of our public lands & is  
unacceptable as is.

Thank you,

Cheryl A. Reiff
